Epsom College Council Exhibition] was the son of Dr J. F. Easmon of Accra, Gold Coast Colony (Ghana). He won an Entrance Scholarship to St Mary's Hospital. Charles Easmon fought against racial

discrimination in the Sierra Leone medical service for many years. When he first returned to his native Sierra Leone in 1913, he was refused a post in the West African Medical Service because of his colour. At that time there were two categories of doctors – Europeans in the “Colonial Service” and Africans in the “Local Service”. Dr Easmon was forced into the separate and lower category as a Country Hospital Native Medical Officer. His campaign against racial discrimination earned the antipathy of the British authorities who called him the “Yellow Peril.” During World War One he served in the army as a medical officer in the Cameroon Campaign. After the war he served in a variety of medical posts and became profoundly interested in the customs and traditions of the native people. He founded the Sierra Leone Museum in 1958, becoming its first curator. He was a director of the Bank of Sierra Leone, Chairman of the Monuments and Relics Committee, and he presided over the declaration of twenty national historic sites. In 1954 he was awarded the O.B.E.

CLAUDE WOODHAM MORRIS (1885-1968). O.B.E., M.B., B.S. (Durham), D.A., F.F.A.R.C.S. [Epsom College 1901-1902] was the son of Dr John Edward Morris of Gosberton, Lincolnshire [Epsom College 1856-1859]. He received his medical education at University College Hospital and Durham University. In the First World War he served as one of the youngest Surgeon Commanders at the Royal Naval Hospital, Haslar, and was awarded the O.B.E. for distinguished service. After the war he was appointed Anaesthetist at the Cancer Hospital (now the Royal Marsden Hospital), before returning to University College Hospital as Consultant Anaesthetist. He was one of the two original examiners for the Diploma in Anaesthesia of the Royal College of Surgeons. His maxim was "When dealing with an unusual case, use a method with which you are thoroughly familiar". Apart from his appointment at University College Hospital, he was Consultant Anaesthetist at the Royal Free Hospital, and the West Herts Hospital, Hemel Hempstead. Claude Morris specialised in anaesthetics at a time when the specialty was virtually unknown as such and practised by only a handful of doctors.

Morrison, Robert Gordon (1896- ?).

Epsom College: 1909-1914

ROBERT GORDON MORRISON (born 1896). T.D., M.R.C.S., L.R.C.P. (Eng.) [Epsom College 1909-1914. prefect. Rugby XV] was the son of Dr Robert Morrison, of Duffield, Derbyshire. He received his education at St Thomas's Hospital, and went into general practice at Duffield, Derbyshire, where he was Medical Officer and Public Vaccinator for the South-East and Mid-Derbyshire Areas. He was an Honorary Lieutenant-Colonel in the R.A.M.C. attached to the I.A.R. Cavalry Brigade.

He won an Open Natural Science Scholarship to Christ's College, Cambridge, and then completed his medical education at Charing Cross Hospital. He went into general practice in London and then at Godalming, Surrey. He played for the Middlesex County Rugby XV.

Munday, Major Richard Burnard (1896-1932).

Epsom College: 1911-1913

MAJOR RICHARD BURNARD MUNDAY (1896-1932). D.S.C., A.F.C., R.A.F. [Epsom College 1911-1913. Rugby XV] was the son of Major General R. C. Munday, of Plymouth. He received his medical education at Guy's Hospital but it is not certain that he obtained a medical qualification, as the First World War interrupted his studies and he enlisted in the Royal Naval Air Service in 1915. In 1916 he served as an instructor at R.A.F. Cranwell and then joined 8 Naval Squadron as a Flight Commander in 1917. He became one of the most celebrated First World War Aces, scoring 9 victories and became the most proficient aviator at attacking and destroying enemy balloons at night. This earned him the D.S.C. in 1918, the London gazette reporting that: "On the 21st February 1918, he attacked a new type of enemy two-seater machine. The

enemy machine dived steeply east, and Flight Commander Munday followed and closed in, firing a long burst at close range, after which the enemy went down vertically out of control, on other occasions ...he has set fire to and destroyed enemy kite balloons both by day and night." In 1925, the Secretary of state for Air, Samuel Hoare, recommended the award of the Air Force Cross to Munday, the recommendation reading: "This officer has set a splendid example of sea flying in a ship plane from a carrier while engaged in continuous reconnaissances under service conditions with the Fleet at sea. These exercises were carried out under conditions that were entirely novel to both pilots and observers and demanded great skill and endurance. Flight Lieutenant Munday's example has been a great incentive to all pilots and observers, and has stimulated Naval flying." He was subsequently awarded the Belgian Croix de Guerre. Richard Munday was member the R.A.F. Rugby XV.

Mutch, John Bernard (1891- ?).

Epsom College: 1904-1907

Young, Francis Brett (1884-1954).

Epsom College: 1895-1901

FRANCIS BRETT YOUNG (1884-1954). M.B., Ch. B., D.Litt. (Birmingham) [Epsom College 1895-1901. Rosebery Prize for

English Literature] was the son of Dr T. B. Young, of Halesowen, West Midlands. He won the Sands Cox Scholarship to Birmingham University. Francis Brett Young was one of England's greatest regional novelists. He wrote thirty novels, four collections of short stories and three volumes of poetry. His novels, *My Brother Jonathan*, *Portrait of Clare*, and *The Young Physician* became best sellers. Francis Brett Young's experiences at Epsom are closely paralleled by those of Edwin Ingleby in *The Young Physician* and in *Wistanlow* (published posthumously in 1956). Writing to the Headmaster of Epsom College, Henry Franklin, in 1951, Francis Brett Young remembered his time at the College. "I left the school with a love for Latin and Greek, which I owed entirely to the inspiration of Hart-Smith. I did, indeed, know a great deal of Sophocles, Euripides and Aeschylus by heart, together with a mass of Virgil and Catullus besides having saturated myself with English poetry." When the eminent surgeon, Jordan Lloyd, considered sending his son to Epsom, he sought Brett Young's advice. "Is Epsom a good school?" says he. "The best in England," I reply, "but don't send a delicate boy there – it's a rough place." And so it was, by Jove, in my day." During the First World War he served as a Major in the R.A.M.C. in East Africa and Egypt, and after a period of general practice in Brixham, Devon, he abandoned his medical career, and in 1919 removed to Capri, where he began a series of novels with a Midlands setting. In 1945 he moved again, this time to South Africa, where he settled at Montagu in the Lesser Karoo. Sir John Squire, discussing the many aspects of Francis Brett Young's art in an article of literary criticism written many years ago, made a statement that is clearly not without importance. "There is no living English novelist worth more to his credit. He is a poet with a sense of fact, a feeling for history and an interest in character; the combination is rare. He is also a doctor and doctors know a great deal." Francis Brett Young died on March 28th, 1954 and his ashes are interred in the north transept of Worcester Cathedral.

Young, Major Charles Owen James (1894-1930).
