Ennion, Eric Arnold Robert (1900-1981).

Epsom College: 1915-1918

ERIC ARNOLD ROBERT ENNION (1900-1981). M.A., M.D. (Cantab.), M.R.C.S., L.R.C.P. (Eng.) [Epsom College 1915-1918] was

the son of Dr O. R. Ennion, of Yoxford, Suffolk. He received his medical education at Gonville and Caius College, Cambridge, and St Mary's Hospital. He initially went into general practice at Burwell, Cambridgeshire, but after the Second World War he gave up medicine to become the first Warden of the Flatford Mill Field Study Centre on the Suffolk Stour (1945-1950). After Flatford, Eric Ennion moved to Monk's House, Northumberland, which he ran as a Field Study Centre (1950-1961). He was the founder of the British Field Study Centres and, as an outstanding artist of natural history subjects, became the first Chairman of the Society of Wildlife Artists (1964). He was a Council member of the British Ornithologists' Union (1959-1962), and Chairman and later Honorary Vice-President of the Society of Wildlife Artists (1964-1975). Although Ennion trained as a doctor, his life-long enthusiasm was for natural history and ornithology in particular. He recorded two episodes from his time at Epsom. "The woods and wide green folds of gorse-cluttered downs swept up to the school walls. With their jays and nuthatches, their bullfinches and sparrowhawks – and all their enchanting butterflies and moths, they drew me as a magnet to a pin." Nature's filled the margins of his school books. He recalled one occasion when they were put to literary use. "Crusty [James Wilson, Classics Master (1895-1923)] looked up from the pile of essays on his desk. "What's a shoveller, Ennion?" "A kind of duck, Sir". I did not "of course" but the tone implied it. He tucked his monocle into his wise old wrinkled face: "what's a syllogism?" "Don't know, Sir". Nobody in Form IIa knew either and there was no further comment on my 'Best Day of the Summer Holiday' essay. We were quits."

Ensor, Colonel Edward Maurice (1913-1972).

Epsom College: 1927-1932

James, William Oswald (1914-1978).

Epsom College: 1927-1932

WILLIAM OSWALD JAMES (1914-1978). M.B.E., M.B., Ch.B. (Edin.) [Epsom College 1927-1932. prefect. Rugby XV. Cricket XI] was the son of Dr W. T. James, of Birmingham, and brother of Dr Evan Lloyd James [Epsom College 1927-1931]. He received his medical education at Edinburgh University, and went into general practice at New Quay, Cardiganshire. During the Second World War he served as a Captain in the R.A.M.C. (1939-1945), in the Welsh Guards. He was a prisoner at Tobruk, North Africa in 1942 and was interned near Brindisi. When the Italians declared an armistice in September 1943, he escaped to make his way across Italy to the American lines. When one of the men in his party developed acute appendicitis, Bill James volunteered to accompany him to the nearest hospital. This proved to be German and he was immediately re-interned. In December 1943 he was transferred for medical duties to a Stalag of about 1,200 men on the German-Polish Border. As he was the only officer, he had not only the responsibility of sole command but also the anxiety of an epidemic of typhus in the neighbouring Russian Stalag. It is greatly to his credit that no case occurred among his men. All the prisoners were then marched ahead of the Russian advance to Bayreuth with Captain James shepherding them. One prisoner said, "If we walked a thousand miles, the captain walked three." At Bayreuth they were herded into the railway yards, which the Allies were bombing incessantly, and casualties were mounting daily, until they were liberated by General Patton's advance. Bill James returned home to take over, single-handed, his father's rural practice in Mid-Wales. He was a member of the Edinburgh University Rugby XV.

He was a member of the North West Epidemiological Club and the British Society for Study of Infection.

Patch, Ian Charles Lodge (1923-1996).

Epsom College: 1937-1942

IAN CHARLES LODGE PATCH (1923-1996). M.D., B.S. (Lond.), F.R.C.P. (Lond.), F.R.C.Psych., D.P.M. (Acad.) [Epsom College

1937-1941. Classics Scholarship. Rugby XV] was the son of Dr C. J. Lodge Patch, M.C., of Lahore, Pakistan. He was awarded an Entrance Scholar to the London Hospital, and was appointed Honorary Consultant Psychiatrist at the Hammersmith, Springfield and St Charles's Hospitals (1959- 1988), as well as Honorary Senior Lecturer in Psychiatry at the Royal Postgraduate Medical School. He was previously Senior Registrar at the Bethlem Royal and Maudsley Hospitals, and Medical Registrar at the London Hospital. On being appointed Consultant Psychiatrist at Springfield Hospital, a Victorian asylum with two thousand patients, he wrote that it "preserved most of the worst characteristics of inactive, laissez-faire psychiatry...with a handful of doctors, some of whom themselves were seriously disabled." His appointment meant that there were now four consultants to care for the patients "in wards of huge collections of miscellaneous inadequately treated patients, many of whom had been there with little reason for much of their adult lives. The fixed ritual each day was lunch, where the four consultants met round a huge table spread with a crisp white cloth, in the middle of which stood a large silver cup, awarded to the hospital farm for pig breeding." Dr Lodge Patch took pride in his work of transforming the hospital over the next twenty five years, with the development of an energetic postgraduate programme for junior doctors, the improvement of patient care and the reduction of patient numbers. Before this appointment he completed his National Service in Nigeria.

Paulley, John Wylmer (1918-2007).

Epsom College: 1931-1936

JOHN WYLMER PAULLEY (1918-2007). M.B., B.S. (Lond.), M.R.C.S. (Eng.), M.D. (Lond.), F.R.C.P. (Lond.) [Epsom College 1931-1935] was the son of Dr John Paulley, of Ufford, Suffolk. He received his medical education at the Middlesex Hospital, where he won the John Murray Medal for Medicine, the Hetley Clinical Prize for Medicine, and the Freeman Scholarship for Obstetrics. He was then awarded the Will Edmunds Research Fellowship of the Royal College of Physicians. He was appointed Consultant Physician to the Ipswich Hospital Group, having previously been First Assistant and Deputy on the Professorial Medical Unit at the Middlesex Hospital. He was President of the Society for Psychosomatic Research (1959-1960); a Council Member of the Royal College of Physicians; a member of the Royal College of Physicians Working Party on General Medicine (1979-1980), and Leader of the E.E.C. Working Group on Stress and the Gastro- intestinal tract, Brussels (1980). In 1967, John Paulley wrote a letter to The Times in which he said "Is it not time to examine the possibility of creating at least one new university in this country on the pattern of those great private foundations in the USA, without whose stimulus and freedom of action the many excellent state universities in that country would be so much poorer." This idea was taken up by a number of people in the business and academic worlds, and in March 1973 the University College at Buckingham was incorporated, in the form of a non-profit making company registered as an educational charity. The University of Buckingham clearly owes its origin to the inspiration of John Paulley.

He received his medical education at Queen's College, Cambridge, and the Westminster Hospital, and was appointed Consultant Anaesthetist (Specialising in patients with Chronic Diseases), to the South West and South East Thames Regional Hospital Boards. "Paul was a man ahead of his time. His use of blood transfusion revolutionised surgery all over the world. As an anaesthetist, he measured the amount of blood loss in his patients, realising that to expedite a speedy recovery the patient needed the same amount of blood put back in. The result was that his patients recovered much more quickly than others. He was on the team working to develop the first heart transplant operation in the U.K., his job being to develop the necessary new anaesthesia techniques. Christiaan Barnard came over to observe the team's progress and then returned to South Africa and performed the first heart transplant in 1967. Paul Sherwood was a pioneer in the treatment of non-specific back pain and developed the treatment that eventually became known as the Sherwood Technique, a

treatment that involved looking beyond the actual attack of pain to the origin of the problem. This technique is now used by practitioners all over the world.

He was appointed Consultant Physician at Omagh Hospital, County Tyrone (from 1949). During the Second World War he served as a Captain with the R.A.M.C. (1940-1946), in France with the 51st Highland Division. He was captured at St Valery while assisting with the evacuation of the wounded, and spent the rest of the war as a medical officer in various prisoner-of-war camps, enduring much privation and semi-starvation. This culminated in a forced march, in the depth of winter, in 1945, from Lamsdorf in Poland to West Germany. During this march, in which nearly 80% of the prisoners died, he contracted diphtheria and survived only by hanging on to a horse drawn cart for several days. He was liberated by the Americans in 1945. His diaries as a prisoner of war, which include an account of this march, are in the Imperial War Museum. After the war he worked at the Middlesex and London Heart Hospitals before his appointment in 1949 as the first Consultant Physician in Omagh. While his main interest was in cardiology, he was an acknowledged expert on sarcoidosis. "He was an excellent teacher and he ran and equipped his own wards and clinics superbly well."
